education

2003: Multimedia Studies Certificate, University of British Columbia
1999-2001: Career Preparation Fine Arts, Victoria High School

experience

Designer + Web Developer

Industrial Brand Creative — industrialbrand.com

2003-current

I am currently employed at Industrial Brand Creative, a Vancouver based full service graphic design firm, branding consultancy and advertising agency. My contributions to the IBC team include creating websites from design through to programming. I also work on major print projects through each phase: concept, design, production and press checking. Throughout the projects I interact with the clients, interpreting their needs and applying their desires into our designs. I also contribute both design and original content to the award-winning company blog: blog.industrialbrand.com.

Designer + Web Developer

Brave Pixel Media Corp.

2003-2004

As an employee of the young design company I was given the opportunity to work on various websites from concept to presentation to completion as well as many smaller print related jobs.

Proprietor

Steady Vibe Design — steadyvibe.com

2003-current

This is my personal domain where I display my love for cupcakes, culture and random points of interest as well as a personal portfolio and playground.
